MB S.p.A. in the Parisian show Intermat

(The MB bucket crushers will be present at the stand K070 of Hall 6 and in the area Paris Demo 07 of Hall E9.)

MB S.p.A., a Vicenza company and leader in the production and sales of bucket crushers, will be participating for the second time in the trade fair Interimat of Paris Nord Villepinte to be held from April 20 to 25, 2009. Interimat, the triennial fair among the most important in the construction sector.

The Paris fair will also be the opportunity to present the latest MB product for the first time. The historical MB bucket crushers will be on show too.

In the meantime, in the external demo area at stand Paris Demo 07 of Hall E9, visitors will view the bucket crushers at work and see the efficiency and quality of MB products for themselves. In fact the demo area will give visitors the chance to appreciate the versatility of the bucket crushers, able to crush all types of material and guarantee optimal efficiency, productivity, savings, profits and respect of the environment.

After starting 2009 with a full agenda of commitments, with participation in the major sector trade fairs at Las Vegas, in Greece, Austria and Slovenia, MB S.p.A., international leader in the production and

sales of bucket crushers, has gone on to confirm its success in France, where a new branch is to be opened soon. Also, over the next few months, MB bucket crushers will reach new horizons, presenting products at national and international fairs, all to demonstrate the success of MB products and loyalty of its clients.

MB in spotlight

The year 2009 is filled with events and changes for the Vicenza-based company, world leader in the manufacture and sale of bucket crushers: events and changes that will lead MB towards new goals but that will above all broaden its already great horizons, leading the company towards the conquest of new markets and the consolidation of existing ones.

The first new event is the change in the name of the company, its structure and organisation: from this year in fact the company changes from being a Srl (limited liability company) to a Spa (joint stock company) reaching the goal much sought after by the Azzolin brothers. Another spotlight has already focused on MB in 2009 thanks to another important event: apart from the

transformation from Srl to Spa, the Vicenza-based company has obtained the UNI EN ISO 9001:2000 Quality Management System certification which has filled with pride the management and all the departments.

In February MB S.p.A. will play its trump cards in Las Vegas together with its American importer at the World of Concrete exhibition. In March the company will move to Greece, at the Metec 2009 exhibition (March 20 to 23) and to Austria, at the Mawev-Show (March 25 to 28). From April 20 to 25, MB bucket crushers will be the protagonists in France at the Interimat 2009 exhibition. In May MB will move to Spain where the company will set up a test site at the Fider 2009 exhibition (Zaragoza, May 20 to 22). In June MB will travel to Brazil to take part in the M&T Expo from June 2 to 6.
