

MB Presents New Bucket Crusher at Intermat

MB S.p.A., a Vicenza company and worldwide leader in the production and sales of bucket crushers, was present at the Interimat trade fair in Paris (from 20 to 25 April) where it showcased its latest product, a new bucket crusher, the result of ongoing investments in technological research and the continuous attention to its customers' needs.

The historical model has been transformed to offer an even more revolutionary product on the market, thanks to the in-depth research of the MB team and technical engineers. The company is committed to the constant satisfaction of customers' requirements, ever attentive to their needs, carefully listening to all problems faced every day on construction sites, finding solutions most suited to the various international situations in which MB S.p.A. operates. It is also thanks to the long-lasting relationships and loyalty of clients that MB can produce bucket crushers that represent a valid work tool. The new version of the bucket crusher is in fact more resistant in work, featuring a more compact size and improved structural layout to facilitate operator maneuvers on the excavator.

Despite the world crisis affecting all sectors, MB confirms its success and keeps on investing in research and development, giving priority to vertical specialization in the production of a single product that enables the guarantee of high quality and top performing bucket crushers. Also, company participation in major national and international events in this sector has enabled MB to establish and strengthen relationships and loyalty with clients, who always receive special attention.

At Interimat, MB S.p.A. was presenting a historical product of the MB house, in a modernized version, once again demonstrating that the investments in research and technology offered to clients ensure that the company achieves the maximum levels of quality and satisfaction. ■
