

MB getting ready for 2010 World Cup

MB's bucket crushers have been involved in the construction of the 2010 World Cup stadium in Johannesburg, South Africa. Designed to accommodate around 100,000 spectators, the stadium will be used to hold the World Cup final in July 2010.

MB spA, based in Italy, manufactures technologically advanced bucket crushers with excellent performance. The MB bucket crushers on the site, mounted on a Caterpillar's excavator, were supplied by the company's subsidiary in South Africa, High Power Equipment Africa for contractor Liviero Civils. ■
