

## MB Crusher on major road project in the Philippines

The BF90.3 bucket crusher attached on a Komatsu excavator.

MB Crusher's BF90.3 bucket crusher has recently been involved in a major road construction project in Bontoc, the Philippines. The project is implemented by the Philippines Department of Public Works and Highways.

The BF90.3 has been designed for use with 20 t to 28 t excavators. On this project, the bucket crusher was attached on a Komatsu PC-200 excavator to crush 18 to 40 cu m of aggregates per hour, depending on the output setting sized.

The BF90.3 was supplied by the company's dealer in the Philippines, Wilan Merchandising Inc, for the contractor R.U. Aquino Construction.

MB Crusher has been active in the Philippines for about a year and is currently growing fast in the Southeast Asia region. ■
